

## NP15B TRUE RMS DIGITAL MULTIMETER

### Product Features

- Data logger & View function (up to 32000 readings)
- Bluetooth Connectivity with Mobile & PC
- 100kHz bandwidth for voltage measurement
- 1kHz Low Pass Filter mode
- NO-GO function
- VAC with 1M impedance
- 4-20mA/0-20mA scale type measurement
- Single fuse for mA & A
- Adjustable square wave output
- Temperature measurement with J, K, Pt100 & Pt1000 sensors
- External power adapter for long hours of measurements
- Selectable clamp ratio for current measurement
- Conductance Measurement
- Frequency / Time Period Measurement

The NP15B-2, NP15B-3, NP15B-5, NP15B-6 series of new multimeters is made for professional use that offers safety, high resolution, large range count, reliability, ruggedness, a complete tool for test automation and is equipped with more than 30 different measuring functions.

## Application

### Low input impedance ( $R_i = 1M\Omega$ )

Trouble shooting a branch circuit with dead or disconnected circuit is made easy with VAC1M $\Omega$ . Low impedance VAC1M $\Omega$  measurement helps eliminating error readings resulting from ghost voltages caused by long wires that share a common conduit.

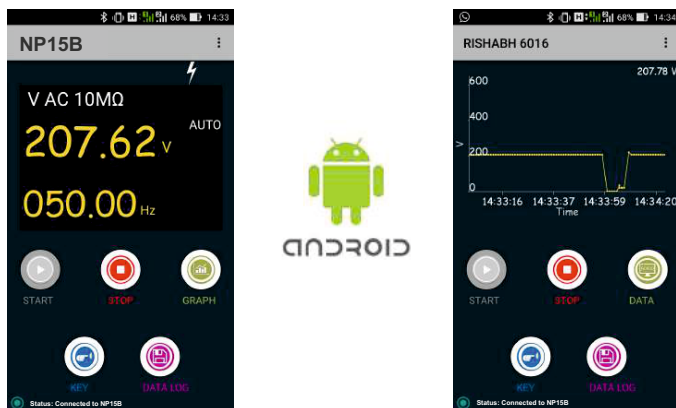

### Single fuse(16A)

Instrument contains a single fuse of 16A common for all the ranges of current from 600 $\mu$ A to 10A AC/DC as compared to the two fuses in traditional DMMs. This eliminates the accidental blowing of 1.6A fuse due to operator's error when higher current is applied in lower ranges.

### Tool for automation, Bluetooth Interface

With ready to use communication protocol, one can easily automate his test system. The extensive data capturing and analysis is possible with Android Application.

Instead of cable, the higher communication distance can be achieved (10m). The Graphical and Tabular analysis is possible over android app.t

### Square Wave Output

A square wave output can be generated from the DMM with the user selectable frequency and adjustable duty cycle. This can be used as baud rate generator, to check flow meters, to test frequency counters, accelerometer and frequency transmitter. It can also be used as audio signal in audio signal testing.

### Current measurement with clamp sensor

Measurement with various clamp sensors is possible, which helps in accurate measurement of current from 60mA to 6000A without interrupting the circuit. The measured current is automatically calculated from the selected clamp ratio.

### Low pass filter(LPF) in VAC10M $\Omega$ & VAC1M $\Omega$

A selectable 1kHz low pass filter offers advanced variable frequency drive filtering to help you accurately analyze non-traditional sine waves and noisy signals. In LPF mode DMM rejects all high frequency noise making it suitable for making measurements on inverters and high frequency drives.

## True RMS measurement with high crest factors

Accurate true RMS measurement of distorted waveform with crest factor CF between 1 to 10.

## Data Logging

NP15B series offers continuous data logging of up to 32000 readings with real time stamping. Log rate is adjustable from as low as 0.1 sec to as high as 1hr.

## External Power Adapter (DC Jack)

The external power supply adapter helps in conserving battery while performing long hours of measurements. When DC jack is connected batteries inside DMM are electronically disconnected, and reconnected in absence of mains, hence there is no need of removing the battery when using the power adapter.

## 100kHz Bandwidth

Alternating voltages with frequencies up to 100kHz can be measured accurately. This is useful while analyzing high frequency analog signals.

## Self battery voltage measurement

Capable of measuring self battery voltage.

## Room temperature measurement

Room temperature can be sensed and measured without any external sensor. The same is used as internal reference temperature in thermocouple based temperature measurements

## Fully programmable GO NO-GO

The Go - NoGo function gives an indication through a buzzer for the applied input lying inside or outside the set band. The values for low limit, high limit and buzzer condition can be easily set through NoGo function in menu settings. Once the NoGo function is set, user can get busy doing other activities in the vicinity of the meter, whenever the condition is met it will be indicated by a buzzer. It eliminates the need of operator to continuously monitor the display.

## View Function

Data logged on meter can be viewed directly on the meter itself, hence the data analysis is also possible without a PC based software. However for graphical and large data analysis PC based software can be used.

## Dangerous Contact Voltage Indication

Presence of hazardous voltage (>35Vrms 50/60Hz and 50Vdc) at the contact terminal are indicated on display. This is very useful while performing measurements in the circuit which takes longer time to discharge its capacitors, or where unexpected danger voltage are present.

## Adjustable Beep Level

With Beep level setting, the limit for continuity can be adjusted from 10Ω to 90Ω depending upon application.

## Separate fuse compartment

Easier access to fuse when replacing the blown fuse.

## Auto Power OFF with adjustable timing

Flexibility to adjust "Auto off" period from 5 minutes to 60 minutes.

## 60mv & 600mV DC & ACDC

This helps in accurate measurement of low output voltages <600mV from sensors & transmitters. High frequency low voltage signal from RF transmitters can also be measured. Signal as low as 0.001mV can be measured accurately.

## Min / Max / Avg measurement

Min/Max/Avg function records the minimum, maximum and average of all the readings applied since its activation.

With dual display it makes it even flexible for the user to keep the trace of the applied readings while viewing Min/Max/Avg readings. The average reading is useful for smoothing out unstable inputs, & verifying circuit performance.

## Dedicated keys for easy navigation

Dedicated navigation keys makes scrolling through menu and setting of parameters easy & comfortable.

1) Specified Accuracy is valid as of 3% of the measuring range. With Short-circuited test probes: residual value of 1 to 30 d at zero point due to the TRMS converter.  
 2) At 0°C to 40°C (Accuracy Range)  
 3) In VAC measurement, Frequency will be shown above 10% of the present range, except for 1000V & 60mV range i.e. 25% & 50% respectively.  
 4) Frequency Influence upto 10kHz.  
 5) Frequency response up to 50 kHz  
 6) Frequency response is valid from 10% to 100% of range  
 7) With Zero Balancing  
 8) Frequency response up to 100 kHz, for greater than 50 kHz plus 2.5%  
 9) Overload capacity of the voltage measurement input: power Limiting: Frequency x Voltage Max : 6x10<sup>6</sup> V x Hz for V>100V  
 10) Frequency response greater than 2 kHz plus 2.5%

Pollution degree:	2
Installation category:	1000 V CATIII / 600 V CATIV, 600V CATII for NP15B-3
High Voltage Test	7.4 kV (EN 61010-1-2010), 3.5kV For NP15B-3

## Battery

Battery Voltage	2 X 1.5 V Cells (LR6 Battery)
Battery type	Alkaline manganese cells.
Battery Life	Appx. 100 Hrs. (Backlight off / Bluetooth off)
	Appx. 48 Hrs. (Backlight off)
Battery test	Automatic display of  symbol when battery voltage drops below approx. 2.4V

## Mechanical Design

Housing	PC ABS
Dimension	200 x 91 x 54 mm
Weight	Approx. 0.5 kg with batteries

## Crest Factor

Additional error caused by signal's crest factor:  $1 < CF < 3$ : 1% R+ 30D  
 $3 < CF < 10$ : 3% R

**Curve 1:** Range from 0.06V to 60V,  
0.6mA to 60mA, 6A

**Curve 2:** Range 600V  
600mA

**Curve 3:** Range 1000V  
10A

Note: With Unknown Waveform (CF > 2), measurement should be made with manual range selection.

## Fuse

Fuse	FF (UR) 16 A/ 1000 V AC/DC; 10 mm x 38 mm (NP15B-5 & NP15B-6)
	FF (UR) 1.6 A/ 1000 V AC/DC ; 6.3 mm x 32 mm (NP15B-2)
Switching Capacity	30 kA at 1000 V AC/DC (NP15B-5 & NP15B-6)
	10 kA at 1000 V AC/DC (NP15B-2)

## Android Application

Class 2 Bluetooth which is integrated in the instrument achieves transmission ranges of up to 10m.

Recommended Screen Size: 4.7" to 7" with resolution 1280 x 720p & above.

Android Version: 6.0 & above.

Meter Setup Parameter can be configured through application.

Measured Parameter can be logged in Excel format on mobile's default memory.

Function, Range and Relative key's operation is possible through application.

Graphical Analysis of measured key's parameter is possible.

Offline Data of meter can be retrieved on mobile through application.

Virtual Display of meter can be observed on mobile application.
